TIVE

A photograph of a car body on an assembly line, showing the front and side of the vehicle. The car is white and is positioned on a yellow conveyor belt. The background shows the industrial setting of a factory with various pipes and structures. Large, bold, yellow text is overlaid on the image, reading 'AU', 'AUT', 'AUTO', 'AUTOM', 'AUTOMO', and 'TIVE' stacked vertically.

# Creating adhesive solutions backed by innovation for automotive customers worldwide.

One product, one project: full fledged-expertise with a single partner

## Adhex automotive market

As a Tier 1 equipment manufacturer, we work according to the standards of the automotive sector, taking into account the requirements of vehicle manufacturers and accompanying regulatory changes. Our portfolio of adhesive products, both standard and customizable, meets various functions: sealing, reinforcement, insulation, sound absorption, identification, protection, decoration and many more.

### Research & innovation

In its adhesives and polymers research and development center (Cerap), Adhex designs adhesives that perfectly meet the needs of manufacturers. It ensures the formulation, the implementation on prototype and the characterization.

### Quality & certification

Adhex guarantees its customers the highest level of quality. Its quality department intervenes throughout the relationship with the manufacturers, from the design of the part to its serial life.

### Technologies

High-tech equipment ensures, in four workshops, the production of Adhex parts for the automotive industry, with a high mastery of various technologies meeting the needs of manufacturers.

# Recognized expertise in the design and production of adhesive products for the automotive market

Adhex works in close collaboration with major automotive manufacturers to provide technical adhesive solutions that meet their nominative requirements as well as the evolution of the automotive world in terms of weight savings, electrification and recyclability.

## Decoration and Customization

Our decorative range for limited edition, special series and original equipment allow to identify, customize and personalize the vehicles.

## Technical labels

Security information, traceability, RFID functionality are covered by our range of printed or line-edge print rework automotive labels.

## Thermoformed Foams and Plastic Films

Allowing to lighten the vehicles, Adhex thermoformed parts in foam or film ensure the air, water, dust and noise protection.

## Die-cut Adhesive Parts

Technical adhesive die cut parts that guarantee watertightness, acoustic and part protection are at the heart of our know how.

## Stiffening and Damping solution

Adhex offers products to avoid sheet metal distortion, to improve the acoustic performance and comfort.

## Interior and exterior adhesive protection

Our adhesive permanent or temporary protection solutions are used for car body, bumpers and painted areas.

## Acoustic & Thermal soundproofing

XL Pad (Fiber) and XL Drypad (Felt) Adhex solutions for automotive acoustic insulation contribute to the comfort and thermal insulation of the vehicle.

Our teams around the world unite behind shared values:  
Technical creativity, Customer focus, Persistence  
Team spirit

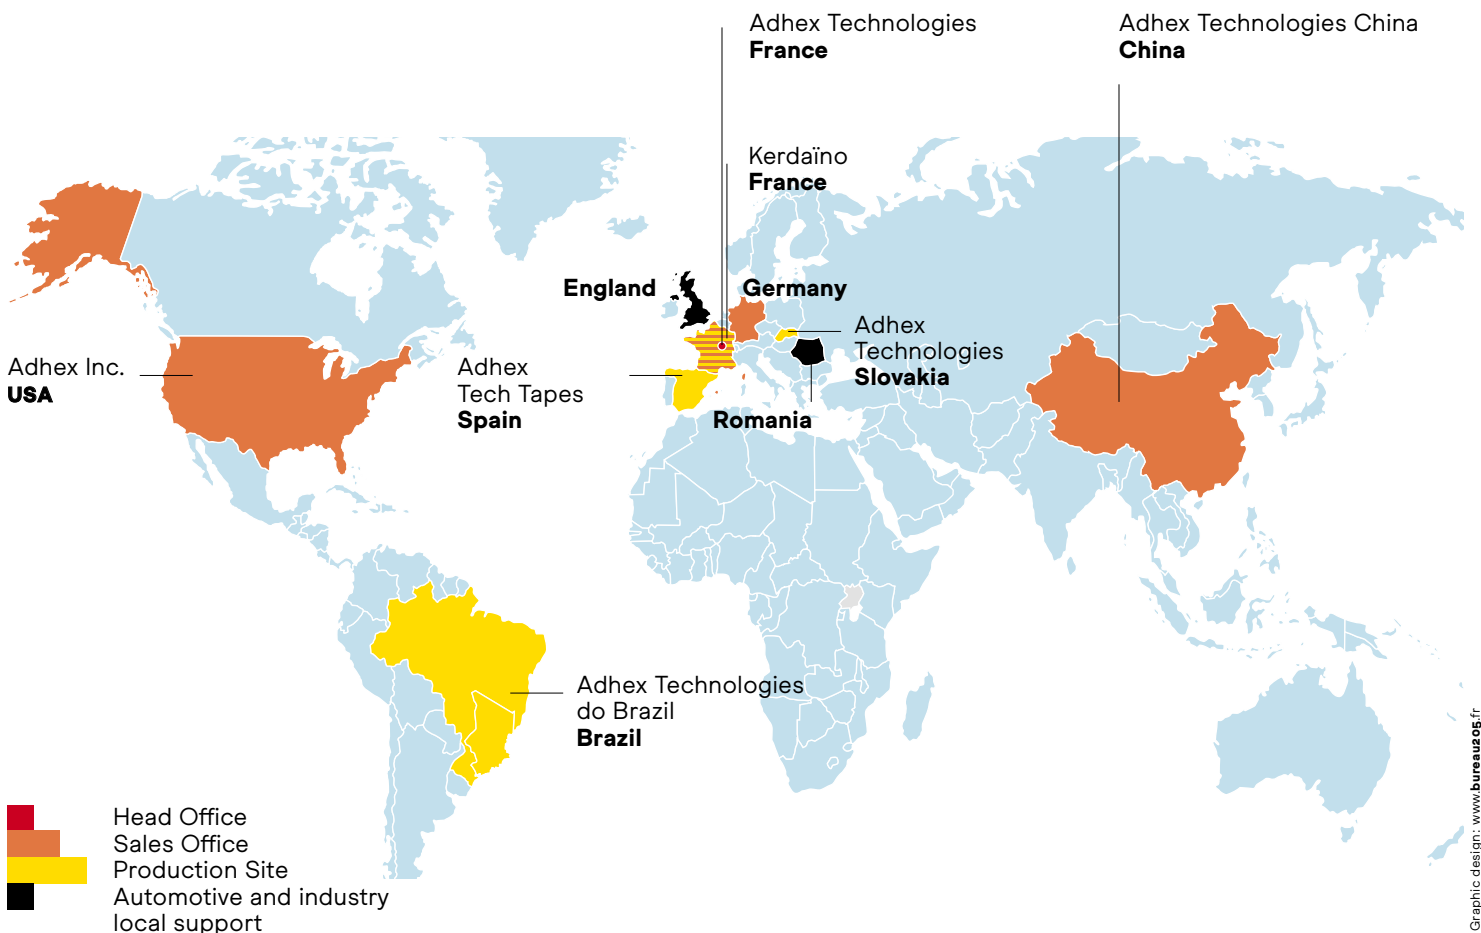

# Burgundy roots, global influence

It is very important to us to be within close proximity to our customers' engineering teams.

As such, we are proud of our Burgundy roots that have allowed us to expand and set up new sites and teams around the globe.

Between France, Spain, Slovakia and Brazil, we benefit from an industrial and strategic presence supported by our commercial agents in the United States, China, Romania and the United Kingdom.

From 5 production plants in Europe and South America, we bring our work as close as possible to you.
