Creating adhesive solutions backed by innovation for industry & building customers worldwide

One product, one project: full fledged-expertise with a single partner

Adhex Industry & Building market

Adhex, partner of your development with technical adhesive solutions for Industry and Building

Adhex teams are pioneer on developing and manufacturing high-performance adhesive solutions for leaders in the Industry and Building businesses. Our experience in the formulation, coating and conversion of pressure sensitive adhesives and technical films positions us as your preferred supplier.

Research & innovation

Polymers research and development center (Cerap) ensures the formulation, the implementation on prototype and the characterization. A continuous effort in Research & Development to anticipate tomorrow's challenges!

Quality & certification

Adhex guarantees its customers the highest level of quality. Quality department operates during all the project life, from prototype to serial production. Adhex is certified: IATF 16949, ISO 9001, ISO 13485, ISO 14001, UL

Technologies

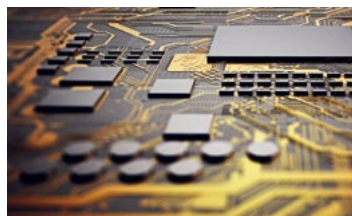

High-tech equipments ensure the production of Adhex parts for industry and building applications, with a high mastery of various technologies meeting you needs.

Discover the Adhex adhesive solutions dedicated to many applications of Industry and Building market

Building & Construction

Adhex offers high-performance industrial adhesive tapes, providing quick and durable solutions for craftsmen and construction professionals.

Electric & Electronic

Adhex offers many adhesive solutions for the identification, assembly and protection of components in the electrical and electronic world.

Traceability & Security

Our self-adhesive identification technologies offer our customers solutions for traceability and sustainable security. Anti-counterfeiting technologies, identifications, RFID...

Graphics & Displays

Adhex self-adhesive films ensure optimal fixing of your decoration, signage and display products on all types of substrates.

Sustainable Energy

Adhex designs specific adhesives for the manufacture and assembly of sustainable energy devices like hydrogen installations, electric batteries, wind turbines...

Smart Cards

Adhex premium adhesives are designed for all types of smart cards, rigid or flexible (smart cards, magnetic stripes cards...)

Household Appliances

Discover our adhesive solutions for appliances. Many possible applications: fixing, decoration, assembly, insulation, identification...

Leatherwork

Adhex develops high quality adhesive products, adapted to the leatherwork industry and intended for application on different carriers.

Mobility

Adhex develops specific adhesives for the mobility market, proposing a wide range of products to fill the many applications.

Our teams around the world unite behind shared values:
Technical creativity, Customer focus, Persistence
Team spirit

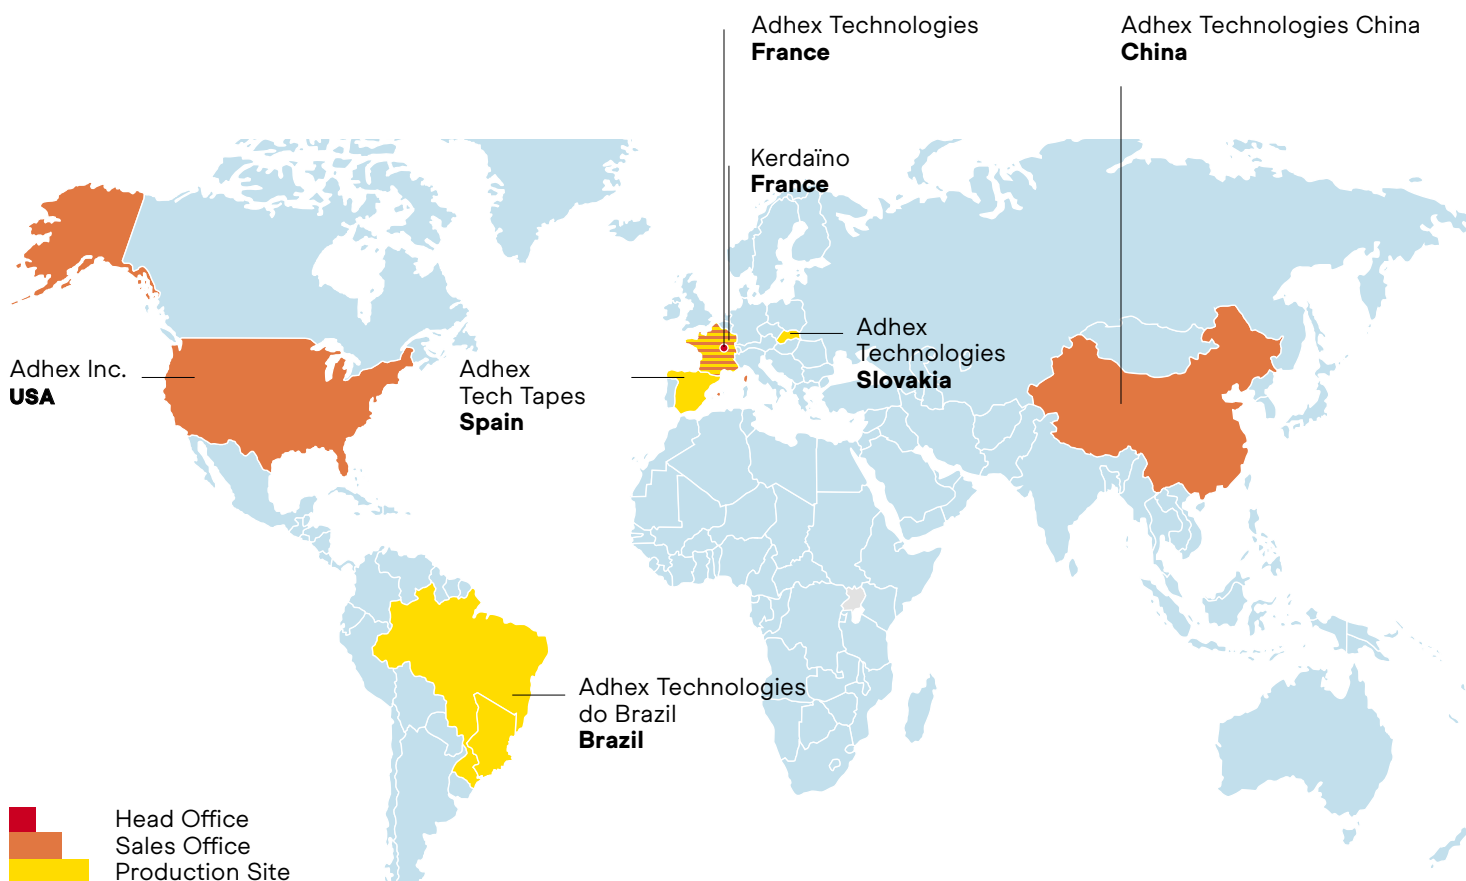

Burgundy roots, global influence

It is very important to us to be within close proximity to our customers' engineering teams.

As such, we are proud of our Burgundy roots that have allowed us to expand and set up new sites and teams around the globe.

Between France, Spain, Slovakia and Brazil, we benefit from an industrial and strategic presence supported by our commercial agents in the United States and China.

From 5 production plants in Europe and South America, we bring our work as close as possible to you.
