Creating adhesive solutions backed by innovation for medical customers worldwide.

One product, one project: full fledged-expertise with a single partner

Adhex Health Care market

Adhex, an expertise in the development of adhesive solutions for the medical field

Adhex's high industrial qualification is recognized and approved by the medical industry. By working hand in hand with the world's leading manufacturers, Adhex masters the technical production aspects and innovates in the design of adhesive components and medical devices for patients and caregivers safety and efficacy.

Research & innovation

Research and innovation are part of our DNA. Formulations developed in our internal laboratory optimize the quality of medical adhesives and meet They offer better performance for various stick to skin applications from low trauma adhesive to stronger adhesion.

Quality & certification

Adhex's Quality approach is essential in designing manufacturing and supplying products in compliance with the ISO 13485 international standard and according to our customers' (OEM) requirements. Adhex also integrates the new Medical Devices Regulations (MDR) in its development policy. Our experts in Quality and Regulatory Affairs are thus able to provide you with technical assistance and support you in your project.

Technologies

Adhex's strength lies in its perfect control of the industrial process. In our R&D laboratory, our technicians have access to the most advanced physico-chemical testing machines. The modern and constantly improved production tooling in either both coating or converting allows us to design and manufacture customized solutions in a fully controlled environment.

Adhex develops and provides different solutions used in wide variety of health care applications

Healthcare adhesives are widely employed in the medical field for ease of use: secured traceability, wounds healing and covering, improving patients comfort, user protection during hospital sessions or surgery procedures, medical device assembly...

Medical device traceability and innovation

Labelling solutions for medical industry's challenges: Medical devices identification, blood bag labelling, safety and traceability.

Woundcare

Wound healing custom made adhesive tapes and dressings designed to answer your specific need : from small cuts to chronic wounds available in roll or ready to use.

Surgical

Our solutions for superior adhesion performances used in challenging conditions in Operating Room: double sided tapes and incision films.

Ostomy care

Optimum skin fixation tapes and custom made adhesive die-cuts for one, two-pieces and drainable collection systems.

Electromedical

Gradual adhesion level backings and hydrogels for Electrodes and ESU plates manufacturing.

Patch / Pharma

Skin friendly adhesive solutions developed and used as components of your transdermal reservoir patches and patches covering.

Vascular Access

Adhesive dressings for patient safety and protection during vascular procedures: post-dialysis, catheter securement and oncology.

In Vitro Diagnostics

Adhesive tapes validated for microtiters sealing during IVD procedures.

Medical device assembly

Wide range of adhesive tapes and die cuts for Medical device components lamination and assembly, including wearable devices.

Our teams around the world unite behind shared values:
Technical creativity, Customer focus, Persistence
Team spirit

Burgundy roots, global influence

It is very important to us to be within close proximity to our customers' engineering teams.

As such, we are proud of our Burgundy roots that have allowed us to expand and set up new sites and teams around the globe.

Between France, Spain, Slovakia and Brazil, we benefit from an industrial and strategic presence supported by our commercial agents in the United States and China.

With our vertical productions units dedicated to coating/slitting and converting/packaging, we bring our know-how to your needs.
